

IronPal — S3 headband placement jig (1:1)

Print Actual size / 100%, no scaling. 30 mm strip = the band face. Whole lockup runs ALONG the

How to use

1. Lay the strip over the band face, top edges aligned, square to the band.
2. Mark icon-center (+) and the wordmark start/end ticks with tailor's chalk.
3. Rotate the **WHOLE** transfer 90 deg CW so "IronPal" + icon read down the band, icon nearest the
4. Press per the locked recipe (prop-branding-recipe_v01.md). Stripe runs the lower long edge.

VERIFY: this bar = exactly 50.0 mm. If not, reprint at 100% (no scaling).
